Google has built a machine-learning feature into its Search bar that allows users to find out which song is stuck in their head simply by singing, humming, or whistling the tune. The feature was rolled out in 2024, but has recently been added to YouTube, which is also a Google product.

You Can Now Hum Songs Into Google Search - The Violin Channel

theviolinchannel : you-can-now-hum-earworms-into-google-search

Answer: Shazam Music Recognition is an app that you can use to identify and find a song using a short sample of their music. You can hum the tune, whistle, or play it on another device
